WE MAKE PIXELS COME ALIVE

The Visualed ST-18P is a transparent, bright and lightweight modular LED screen for indoor and most outdoor applications. With a 18mm. pixel pitch and 3.800 Nit brightness, The Visualed ST-18P provides the best of two segments by combining transparency and high resolution into one unique product.

The Visualed ST-18P

Based on the proven concept of Visualed X'64 series, the ST-18P delivers impressive image quality combined with a very high colour uniformity obtained by using the latest SMD single dot technology. The relative small footprint of each module and the new flexible Click 'n' rig system enables fast routines and a wide range of applications.

ST-18P comes with a all onboard pack, where power supply and signal processing are integrated into each module with practically no limitations. The system uses CAT-5 network cables with Neutrik connectors for signal distribution between modules and the LEDTalk: G8 data protocol enables cable lengths up to 80m. between modules without signal loss or noise. For large scale projects where signal distances can exceed 80m. a LED-Flash optical link can be inserted anywhere in the data path allowing cable lengths up to 5000m.

No more external PSU's, Signal boosters, digitizers etc...

ST-18P is among the most silent LED screens on the market, due to the design using passive convex cooling no fan is needed. This feature has proven the system to be very useful in TV and theatre applications, where silence is demanded.

ST-18P is ready to tour as a special designed flightcase is available. The flightcase can carry 8 modules and 2 x Click 'n' rig fly brackets plus cables, the case are build for the tough life on the road, and keep all standard european truck measurements: (60cm. Wide. - 120cm. Length. - 80cm. High). Weight fully loaded: 160kg. (8 modules, fly brackets and cables).

Technical specification Visualed ST-18P

High contrast

High transparency

Double visual layers

Pixel pitch

18 mm.

Brightness

3.800 Nit (Cd/m²)

LED Configuration

3-in-1 SMD

Viewing angle

H>145 - V>100 Deg.

Front

Anti reflective black plastic lamel

Transparency (See-thru factor)

35% / incl. integrated control box

Lifetime (Full white, half brightness)

50.000 hrs.

Power consumption

Max 300W / Per module

Voltage

110 - 230V

Connections

Signal: Neutrik CAT-5

Power: Duraplug 16A

Signal source: LEDtalk: G8 Digitizer

Signal latency: >20ms.

Cooling

Passive / No fans

Processing

<16 Bit per colour

Colours

180 trillion

Refresh rate

Variable: < 800Hz

Humidity range

10 - 99%

Protection rating

IP 65 IEC / EN60529

(Limited outdoor use: prevent from possible flooding)

Size

57,6W x 57,6H x 8,5D cm.

Weight

9,5 kg. per module

Rigging

Vertical: Click 'n' rig system

Horizontal: Fastfit sidelock system

Max hang

18 modules: 10,36 m. high

Flightcase

Fastfit sidelock system

SMD single dot

Click 'n' rig fly bracket

Click 'n' rig connection

Onboard control and PSU

ISUALED

ST-18P
